#### ADDITIONAL RESOURCES FOR MARKET GROWERS:

**Growing for Market** is America's most respected source of information about growing and selling vegetables, fruits, herbs, flowers, and plants. **GFM** is a monthly magazine about small-scale farming, sustainable agriculture and farm direct marketing. It covers farmers markets, farm stands, Community Supported Agriculture, and selling locally to restaurants, supermarkets, natural food stores and florists. **GFM** covers cut flowers -- one of the most profitable crops for local growers -- in every monthly issue.

#### ATTRA      Tree Fruits: *Organic Production Overview*

This guide is an overview of issues relevant to commercial organic production of temperate zone tree fruits and, to a lesser extent, tree nuts. It includes discussions of marketing and economics, orchard design, and cultural considerations, including crop varieties, site selection, site preparation, soil fertility, weed control, and pest management (insects, diseases, and vertebrates). It raises questions for the grower to consider in making decisions about orchard and enterprise design. Lists of electronic and print resources offer further, more detailed information.
